MARYAM ALI Full-Stack .NET Developer

mariyamali1623@gmail.com | +92 327 4756937 | Lahore, Pakistan | LinkedIn

PROFESSIONAL SUMMARY

Software Engineer specializing in backend and full-stack development, with a primary focus on C#, ASP.NET Core, REST APIs, and relational databases. Experienced in multi-tenant platforms, RabbitMQ messaging, authentication, and payment integrations, with recent hands-on work in Next.js, NestJS, and TypeScript on a restaurant POS revamp.

PROFESSIONAL EXPERIENCE

Techverx, *Software Engineer* 11/2025 - Present | Lahore, Pakistan

- Deliver backend and full-stack features for a multi-tenant low-code framework and a restaurant POS and payments platform.
- Build backend services using ASP.NET Core and PostgreSQL, and contribute to the Friday POS revamp using Next.js, NestJS, and TypeScript across POS and backoffice applications.
- Investigate cross-service production defects and work with product, frontend, and QA teams on implementation, testing, and release readiness.

Phenologix, *Associate Software Engineer* 10/2024 - 10/2025 | Lahore, Pakistan

- Built business applications and REST APIs for real-estate and legal-services products using ASP.NET Core, ASP.NET MVC, EF Core, Razor Views, jQuery, and AJAX.
- Implemented JWT, ASP.NET Identity, cookie authentication, and role-based access controls for multi-user workflows.
- Designed SQL Server and MySQL schemas, migrations, and queries, and optimized data access while supporting production fixes.

Ammag IT Solutions, *Associate Software Engineer Intern* 06/2024 - 09/2024 | Lahore, Pakistan

- Contributed ASP.NET Core APIs and PostgreSQL features to the live Sorrow Place application, including defect resolution, endpoint validation with Postman, and database maintenance.

PROJECTS

CIS UI Framework / Common Central Framework (CCF)

Multi-Tenant Low-Code Platform

Technologies: .NET 8, PostgreSQL, RabbitMQ, MassTransit, Keycloak, Ocelot

- Added row reordering, automatic number generation, and custom layouts for tenants, plus automatic Conversation Agent database setup for new tenants.
- Improved publishing and import/export so application data models, screens, layouts, and settings transfer correctly between environments.
- Built APIs to list chatbots, retrieve tenant database schemas, and manage users through Keycloak, supporting screen building and tenant administration.
- Fixed data-saving, database relationship, and caching issues in dynamic CRUD APIs, including duplicate records and invalid PostgreSQL data types.
- Improved RabbitMQ/MassTransit background workers by reducing EF Core data loading and strengthening retries, failed-message handling, and recovery.

Friday POS, *Cloud Restaurant Management and POS Platform*

Worked on the original .NET platform and its subsequent Next.js/NestJS revamp across POS and backoffice (admin) applications.

Original .NET stack: ASP.NET Core, PostgreSQL, Global Payments
Revamp: Next.js (frontend), NestJS (backend), TypeScript/TSX, RabbitMQ, PostgreSQL

- **Revamp:** Developed POS and backoffice order workflows, including order listing, history, and order details, using Next.js, NestJS, and TypeScript.
- Implemented RabbitMQ-based order synchronization between POS and backoffice for asynchronous order processing and consistent order data.
- Delivered sales reporting across POS and backoffice to support sales visibility and daily operational tracking.
- **Original .NET:** Built Global Payments workflows for payer creation, tokenized and saved cards, charging, deletion, and Pay-by-Link transactions.
- Fixed unauthorized cross-customer access and tenant query-filtering defects to strengthen data isolation.
- Improved payment access-token generation through caching, concurrency control, and nonce-based signing, and resolved authentication and transaction failures.

MojiGurukul, *AI-Enabled Gamified Learning Platform*

Freelance project

Technologies: ASP.NET Core, PostgreSQL, REST APIs, Razorpay, SignalR

- Connected student profiles, assessment outcomes, game activity, and learning progress to AI personalization workflows.
- Corrected progress persistence and status transitions for in-progress, completed, and replayed activities, and resolved tutorial sequencing and navigation issues.
- Supported Razorpay subscriptions and checkout, including payment links, plan handling, and upgrade/downgrade state management.

10Marla, *Real-Estate CRM and Property Marketplace*

Technologies: ASP.NET Core, Razor Views, SQL

- Developed APIs for property listings, search, filtering, bookings, user accounts, and administration. Built Razor interfaces and optimized SQL queries.

SKILLS

Backend: C#, ASP.NET Core, .NET 8, ASP.NET MVC, REST APIs, Entity Framework Core, Dapper, LINQ, Node.js, NestJS

Frontend: React, Razor Views, HTML, CSS, jQuery, AJAX

Databases and Caching: PostgreSQL, SQL Server, MySQL, Redis, Valkey

Architecture and Messaging: Microservices, Multi-Tenancy, RabbitMQ, MassTransit, SignalR, Ocelot, Background Workers

Security: Keycloak, JWT, ASP.NET Identity, Role-Based Access Control

Payments: Global Payments, Razorpay

Tools and Observability: Git, Docker, Postman, Swagger, Prometheus, Grafana Loki, Structured Logging

EDUCATION

BS in Computer Science | 2020 - 2024

Punjab University College of Information Technology (PUCIT), Lahore
